

RSM MK3 scope Fit Mount (Not RSM Mount)

Hello, customer:

When you purchase a separate RSM MK3 scope, you should pay attention to the following details during the mount process:

1. Because different manufacturers have different details and sizes. So it may need to be adjusted.
2. In the process of mount, it is necessary to ensure that the crosshair, scope and rifle remain horizontal, and the locating hole on the mount may need to be enlarged (polished).
3. It is strongly recommended that a professional gunsmith complete the mount work.
